PROFESSIONAL SUMMARY

Full Stack Developer at R2A Information Technology with hands-on experience developing and maintaining commercial web applications, backend services, and production systems. Experienced in API development, database management, authentication, third-party integrations, and production troubleshooting, with a practical approach to solving technical challenges and delivering reliable, maintainable software.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), Python, TypeScript
- Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive UI, Performance Optimization
- Backend & APIs: Node.js, Express.js, RESTful APIs, API Integration
- Databases & ORM: PostgreSQL, MongoDB, Prisma, Mongoose
- Authentication & Security: JWT, Better Auth, OAuth, Role-Based Access Control (RBAC), Password Hashing
- Cloud & Deployment: AWS EC2, Nginx, Vercel, Firebase, Linux (Ubuntu)
- Payments & Integrations: Stripe, BenefitPay, Apple Pay, Google Pay, n8n Automation
- Tools: Git, GitHub, Postman, Figma, WordPress, Cursor, Claude Code, ChatGPT

WORK EXPERIENCE

Full Stack Developer | R2A Information Technology **May 2026 – Present**
Dhaka, Bangladesh (On-site)

- Developed scalable web applications and RESTful APIs using Next.js,React.js, Node.js, Express.js, PostgreSQL, Prisma, and MongoDB.
- Implemented authentication, authorization, database management, third-party API, and payment gateway integrations.

FEATURED PROJECTS

YJEEK – Multi-Service On-Demand Platform **[Live Demo]** | **[Google Play]** | **[Drive Link]**
Commercial Client Project | Bahrain

Contributed to the development and production maintenance of a multi-service platform connecting customers, drivers, vendors, and administrators through mobile applications and web-based management systems.

- Developed and maintained RESTful APIs, authentication, role-based access control, and core workflows for customers, drivers, vendors, and admins using Node.js, PostgreSQL, and Prisma.
- Integrated payment services including Benefit, BenefitPay, Apple Pay, and Google Pay, while supporting Firebase and Flutter-based mobile application integrations.
- Managed AWS EC2 production deployments, Nginx, environment configuration, database connectivity, troubleshooting, and ongoing backend operations.

Tech Stack: Node.js, Express.js, PostgreSQL, Prisma, Firebase, REST APIs, AWS EC2, Nginx, Flutter API Integration, Payment Gateway Integration, RBAC

CookLy – Recipe Sharing & Premium Membership Platform **[Live Demo]** | **[Frontend Repo]** | **[Backend Repo]**

Developed a production-ready full-stack recipe sharing platform that enables users to publish, discover, purchase, and manage recipes while providing subscription-based premium features and a centralized admin management system.

- Built a complete recipe marketplace where users can publish, edit, delete, search, filter by category, like, wishlist, and purchase recipes through an intuitive and responsive interface.
- Implemented a subscription-based membership system (Free, Pro, Premium) with Stripe Checkout, enabling secure recurring payments, premium content access, and recipe publishing limits based on user plans.
- Developed role-based dashboards for Users and Admins, allowing users to manage recipes, purchases, subscriptions, and profiles, while admins can manage users, recipes, memberships, payments, and block/unblock accounts from a centralized dashboard.
- Designed secure authentication and authorization with protected routes, premium recipe access control, transaction history, responsive dark/light mode UI, and custom error handling to deliver a production-level user experience.

Tech Stack: Next.js,React.js, Tailwind CSS,Node.js,Express.js MongoDB,Stripe, JWT Authentication, Better Auth

EDUCATION

B.Sc. in Computer Science & Engineering

Fareast International University || Expected 2027

Complete Web Development With **Programming Hero**
