WORK EXPERIENCE

Frontend Developer Intern | Rupsha It Park **Aug 2025 – Feb 2026**
Khulna, Bangladesh (Remote)

- Developed responsive Portfolio and Landing Pages from Figma designs using React.js, Next.js, Tailwind CSS.
- Managed the complete frontend development process from design to deployment.

FEATURED PROJECTS

CookLy – Recipe Sharing & Premium Membership Platform Live | Github | Server

Developed a production-ready full-stack recipe sharing platform that enables users to publish, discover, purchase, and manage recipes while providing subscription-based premium features and a centralized admin management system.

- Built a complete recipe marketplace where users can publish, edit, delete, search, filter by category, like, wishlist, and purchase recipes through an intuitive and responsive interface.
- Implemented a subscription-based membership system (Free, Pro, Premium) with Stripe Checkout, enabling secure recurring payments, premium content access, and recipe publishing limits based on user plans.
- Developed role-based dashboards for Users and Admins, allowing users to manage recipes, purchases, subscriptions, and profiles, while admins can manage users, recipes, memberships, payments, and block/unblock accounts from a centralized dashboard.
- Designed secure authentication and authorization with protected routes, premium recipe access control, transaction history, responsive dark/light mode UI, and custom error handling to deliver a production-level user experience.

Tech Stack: Next.js,React.js, Tailwind CSS,Node.js,Express.js MongoDB,Stripe, JWT Authentication, Better Auth

Pet Bond - Pet Adoption Platform Live | Source | Server

Built a full-stack pet adoption platform that connects pet owners with potential adopters, enabling users to discover pets, submit adoption requests, and complete the adoption process through a centralized online system.

- Enabled pet owners to publish pet listings and allowed adopters to browse available pets and submit adoption requests through a centralized platform.
- Developed 3 role-based dashboards for 50+ users with secure authentication and pet management features.
- Integrated donation and fundraising features that allow users to support pet welfare campaigns and contribute to animals in need.

Tech Stack: React.js, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB,JWT Authentication,Better Auth

EDUCATION

Fareast International University || Expected 2027
B.Sc. in Computer Science & Engineering
